

Iurii Afinogenov

Technology Architect & Systems Coordinator: IT Infrastructure, Network Security, Development/Automation, International Business & Compliance

Phnom Penh, Cambodia | +855 69 307 033 | afingenov@ua.fm | Telegram: @IuriiAfinogenov | [linkedin.com/in/iuriiafinogenov](https://www.linkedin.com/in/iuriiafinogenov)

Profile

20+ years of experience spanning IT infrastructure, network security, web development/automation, and international entrepreneurship. Built and administered corporate networks and server infrastructure, conducted vulnerability audits and implemented data protection (PGP encryption, hardening, access control), developed and maintained web applications (PHP/Laravel, SQL, Python/Selenium), founded and managed companies across multiple jurisdictions (Russia, USA, Cambodia, Hong Kong), and supported international trade and payment transactions. Holds two university degrees — technical (Computer Software and Automated Systems) and legal (IT Law).

I'm not just a coder who executes a spec — I design the solution as a whole, from analysis and options through to architecture and infrastructure. Just point me at the goal; you won't need to manage me step by step. I'm equally comfortable building a team from scratch or plugging into one that's already there, I negotiate directly with outside partners and vendors, and I take ownership of the outcome — including the parts I handle with my own hands when it counts — reporting back on progress and results at every stage.

IT is where I gravitate and where I'm strongest — but the same systems-thinking has been called on well outside it, from full power/sound/lighting infrastructure design for a music festival (Kazantip) to hands-on operational builds. The common thread isn't a specific tech stack — it's taking an unfamiliar problem and owning it through to a working result. First entrepreneurial experience — running a computer club as a student (2002–2003, informal, not formally registered as a legal entity).

Key Skills

IT Infrastructure & Networks: Linux/Windows Server, server administration, corporate network design, redundant internet connections, CCTV systems, IP telephony (VoIP/Zadarma), Novell (early experience)

Information Security: PGP encryption & signing, full-disk/system encryption, hardening, access control, vulnerability audits, secure server infrastructure, thin clients; self-taught offensive-security fundamentals (Kali Linux wireless testing, SQL injection & database resilience testing, QR/Base64 data analysis)

Development & Automation: PHP, Laravel, SQL/MySQL, HTML/CSS/jQuery/AJAX/XML, Python (Selenium, AI-augmented development via Copilot/Claude), tkinter (GUI), web scraping/parsing, 1C integration

Payment Systems & Fintech: Payment gateway integration (Stripe, PayPal, Coinpayments, custom payment aggregators), SWIFT fundamentals (MT103/MT202/MT799, RMA), crypto payments (ETH/ERC20, TRX/TRC20), OAuth integrations

International Business & Compliance: Company registration and administration (Russia, USA/Delaware, Cambodia, Hong Kong), dealings with counterparties in offshore jurisdictions, banking compliance and corporate account opening, international trade and logistics, contract management (Booking.com, Agoda, Expedia)

Management & Coordination: Coordinating teams of up to 50 people, project and contractor management, working with freelancers, operational IT infrastructure management for events

Office Tools: Advanced Excel/Google Sheets (automation, parsers)

Languages: Russian (native), English (fluent, IELTS 7.9, 2008)

Experience

Facebook Marketplace/Groups Automation Tool Development

2025 — Present

- Independently designed and built (using AI tools, Copilot) a Python/Selenium script for automated posting of listings to Facebook Marketplace and groups.
- Implemented reading of source data from a pipe-delimited CSV, a tkinter GUI, browser tab management, and automatic multi-photo upload.

Telegram Mini-App Online Store — YoYo Shop, Cambodia (family project)

2023 — Present

- Developed and maintained a product catalog as a Telegram mini-app; automated order processing.
- The store has since fully migrated to the Grab Cambodia app.

Founder & Director — SKASALE CO., LTD, Cambodia

2017 — Present

- Founded the company (2017), VAT registration; negotiated and managed contracts with international booking platforms — Booking.com, Agoda, Expedia (2017).
- Built the company's banking infrastructure: comparative analysis of ~15 Cambodian banks on account-opening terms and POS acquiring; set up international payment acceptance (SWIFT, Maybank Cambodia, ABA Bank).
- 2018 — due diligence for a bunker fuel supply project (RMG 380): analyzed 3 import scenarios, calculated customs duties, worked with quality certificates and shipping documentation.
- 2019 — commission agent on 5 equipment supply projects (elevators) between Silver Elevator Korea and clients in Russia and Kazakhstan.
- 2020–2021 — official dealer/representative for electronics brand EnnoPro Group Limited in Cambodia: sales and servicing, including on-the-ground retail deals — e.g., sale of a batch of hybrid car batteries (Toyota Prius) to a local auto service shop.
- 2021 — repeatedly organized international industrial equipment supply deals between overseas suppliers (China) and buyers in Russia/CIS — full cycle: contracting, logistics (FOB/CIF), intermediary margin control.
- Studied payment infrastructure and standards (SWIFT Information Paper, Wolfsberg Guidance, MT103 vs MT202 analysis); corresponded with foreign banks on correspondent banking relationships (RMA).
- Registered a developer account with the Visa Developer Center (Sandbox activated, 2019) as part of studying Visa's payment infrastructure.
- Set up email gateways on Alibaba Cloud for client mailings and implemented SMS OTP verification for client projects.
- Prepared a proprietary consulting services package: company registration, VAT/licenses, trademarks, corporate account opening, market/sales research — IT & Compliance Consulting practice for Southeast Asian businesses.
- 2021 — official representative of a foreign company for administrative procedures in Cambodia.

Founder — Ensis Limited, Hong Kong

2019 — 2024 (inactive)

- Founded and sole owner of the company (Certificate of Incorporation No. 2812611, Hong Kong Companies Registry); sole director and shareholder.
- Personally opened a corporate account with Bank of China (Hong Kong) — traveled to Hong Kong (~2 weeks) to complete banking compliance and sign documents in person.

IT Infrastructure & Platform Development — Crypto Platform (Kubera / WinAllGo / Dzambala LLC)

2020 — 2021

- Infrastructure support for a gaming web platform: office setup, internet infrastructure, ad campaign automation — Facebook Ads, push ads, Google Ads.
- Developed and maintained a PHP/Laravel web platform: deployed on VPS (Linux, cPanel on GoDaddy; parallel testing of deployment on AWS EC2), configured domain and mail, liaised with the vendor on installation bugs, maintained the GitHub repository.
- Integrated payment infrastructure: PayPal, Stripe, Coinpayments, crypto wallets (Metamask/ETH, Tronlink/TRX), custom integration with a third-party payment aggregator's API (payment methods for Vietnam/India markets — Zalo, Momo, ViettelPay, Paytm, UPI, Razorpay, etc., request signing, webhook logic), attempted OAuth integration with Coinbase.
- Developed a Telegram bot on a third-party PHP SDK, customized for project needs.
- Operational management of a call center (up to 50 people): advertising, CRM, sales scripts.
- 2021 — founded Dzambala LLC (Delaware, USA) as a legal entity for accepting payments; deployed separate server infrastructure (CentOS 7 + cPanel).

IT Infrastructure — Libra Mining (crypto project)

~2022 (6 months)

- Deployed and supported multiple offices with redundant internet connections (several independent provider contracts across different sites) to ensure call center continuity.
- Procured and configured equipment, including CCTV systems for call center oversight.
- Developed the project's coin smart contract on Ethereum.
- Independently authored the project's technical documentation — white paper and roadmap.

Power, Sound & Lighting Infrastructure Design — "Kazantip" Festival, Cambodia

Oct 2014 — Feb 2015

- Full design of the event's power infrastructure: load distribution across 5 generators with precise capacity calculations (Ah).
- Designed sound (JBL SRX, Meyer Sound) and lighting (LED PAR, Blinder, Strobe) infrastructure; zoned multiple stage areas.
- The festival opening was planned for February 18, 2015 on Koh Pos Island (Snake Island) near Sihanoukville; the project was fully prepared, but Cambodian authorities cancelled the event at the last moment.

Head of Cultivation — Hydroponic Farm / Microgreens, Cambodia

Jul 2022 — Apr 2025

- Full responsibility for the production cycle: seed and substrate procurement, sourcing nutrient suppliers (Spain) and seed suppliers (UK).
- Automated growing processes using IoT devices (Xiaomi Mi).
- Business sold to partners in April 2025.

Visa & Immigration Consultant — Expat Services, Cambodia

Jan 2022 — Dec 2025

- Full-service support for clients on visa and ID matters ("bring the documents, I'll handle everything" model), premium market segment.

Founder — Nikson LLC (ООО «НИКСОН»), Vladivostok

Jun 2014 — Jul 2015

- Founded and served as sole owner of the company (OGRN 1142540004970), registered June 30, 2014; handled IT-agency-type activities as part of preparations to relocate abroad.

IT Support for Election Campaign — Vladivostok Mayoral Election Campaign

May — Sep 2013

- As part of a development team (together with the "Kazini" team), designed an Android app for conducting sociological surveys ("People's Expertise"): interviewers entered data directly on tablets instead of paper forms, with data syncing to the server in real time, letting campaign staff monitor survey progress live from headquarters.
- Developed a ballot-scanning system for internal party primaries.
- Full operational responsibility for the event's IT infrastructure: procured 200+ Android tablets, daily reporting.

IT Consultant, Corporate Network Reconstruction — Far East-Building Construction, Primorsky Krai

Apr 2009 — Sep 2009

- Reconstructed the corporate network; analyzed and procured network equipment.
- Designed a CCTV system and a personalized access-control system.
- Synchronized 1C across 3 servers; consolidated a network of roughly 9–13 group companies into a single infrastructure across two cities.

Information Security Consultant — Group of Companies (Edison / GUM / Green Cafe holding), Vladivostok

Mar 2008 — Mar 2009

- Conducted a vulnerability audit of the group's IT infrastructure.
- Implemented thin clients and PGP encryption for corporate phones and email.
- Built a hidden (secured) server infrastructure for sensitive data.

Internship — Database Systems Support — Vladivostok Traffic Police (GAI) Division

Jun 2004 — Sep 2004

- Summer internship as part of law faculty studies (specialization in criminal law / IT crime); configured and supported a records database as practical coursework.

Specialist, Tax Reporting Server — FAPSI, Vladivostok

Jan 2005 — Jun 2005

- Built and configured a tax reporting server for electronic filing by legal entities in Vladivostok; maintained server operations; trained new staff.
- First hands-on experience with PGP data encryption.

IT Support & Debt Collection Specialist — RosBank, Vladivostok

Feb 2006 — Aug 2006

- Problem debt department: liaised with third-party credit organizations; worked with databases.
- Left this role in August 2006 following a car accident that required an extended recovery period.

Freelance Web Development — TRF-United, Vladivostok

Sep 2007 — Dec 2007

- Developed an interactive catalog of HS (customs) codes using jQuery/AJAX/XML.

System Administrator (project-based) — Avtogarant Insurance, Vladivostok

Apr 2007 — Aug 2007

- Administered the branch network (~20 employees); synced with the company's federal network; supported 1C and insurance product databases.

Semi-Freelance IT Support — Restart LLC, Far East Mortgage Broker, "Hot Car" (AVTOREGION 25), and others, Vladivostok

Jan 2007 — Dec 2013

- Ongoing project-based IT support for multiple clients: computer and database setup, documentation assistance.

**Developer & System Administrator (seasonal) —
Avtopartner Co. Ltd., Vladivostok**

Dec 1999 — Feb 2000

- Built a Russian-language clone of Japanese car auction sites: scraped Japanese sites in PHP at 5-minute intervals; built an SQL matching database (an early "translation dictionary" of terms); emulated a hardware USB security token.

**Developer (seasonal) — "Kontinent Advertising
Materials," Vladivostok**

Dec 2000 — Feb 2001

- Built a custom PHP/MySQL CMS for an online product catalog (no ready-made solutions existed at the time), allowing sellers to add and remove products themselves.

Education

**Faculty of Law, specialization in Criminal Law (IT Crime)
— Far Eastern State University (DVGU), Vladivostok**

2004 — 2008

- Thesis: "Prevention of Crimes in the Field of Computer Information."
- Internship — database systems support at the Vladivostok Traffic Police (GAI) division (see Experience, Jun-Sep 2004).

**Institute of Mathematics and Computer Science,
Computer Software and Automated Systems — Far
Eastern State University (DVGU), Vladivostok**

1999 — 2004

- Thesis project — visualization of oceanographic data from buoys in the Sea of Okhotsk (temperature, currents) for tracking gray whales: FTP data collection, SQL processing, map-based visualization.
- Academic advisor — V.V. Gribova (Institute of Automation and Control Processes, Far Eastern Branch of the Russian Academy of Sciences).
- Received a letter of appreciation from Greenpeace for the thesis project.

Additional

- IELTS — 7.9 (2008; fluent English).
- Junior Achievement certificate, "Applied Economics" course (1999).
- First entrepreneurial experience — ran a computer club as a student (2002–2003, informal venture).
