

Iurii Afinogenov

Technology Architect / Systems Coordinator

Phnom Penh, Cambodia | +855 69 307 033 | afingoenov@ua.fm | Telegram: @IuriiAfinogenov | linkedin.com/in/iurii-afinogenov

Profile

20+ years of experience spanning IT infrastructure, network security, web development/automation, and international entrepreneurship. Built and administered corporate networks and server infrastructure, conducted vulnerability audits and implemented data protection (PGP encryption, hardening, access control), developed and maintained web applications (PHP/Laravel, SQL, Python/Selenium), founded and managed companies across multiple jurisdictions (Russia, USA, Cambodia, Hong Kong), and supported international trade and payment transactions.

I'm not just a coder who executes a spec — I design the solution as a whole, from analysis and options through to architecture and infrastructure. Just point me at the goal; you won't need to manage me step by step. I'm equally comfortable building a team from scratch or plugging into one that's already there, I negotiate directly with outside partners and vendors, and I take ownership of the outcome — including the parts I handle with my own hands when it counts — reporting back on progress and results at every stage.

IT is where I gravitate and where I'm strongest — but the same systems-thinking has been called on well outside it, from full power/sound/lighting infrastructure design for a music festival (Kazantip) to hands-on operational builds. The common thread isn't a specific tech stack — it's taking an unfamiliar problem and owning it through to a working result.

Key Skills

INFRASTRUCTURE

Infrastructure & Networks

Linux/Windows Server, corporate network design, redundant internet connections, CCTV systems, IP telephony (VoIP/Zadarma), Novell (early experience)

DEV & AUTOMATION

Development & Automation

PHP, Laravel, SQL/MySQL, HTML/CSS/jQuery/AJAX/XML, Python (Selenium, AI-augmented via Copilot/Claude), tkinter, 1C integration

BUSINESS & COMPLIANCE

International Business & Compliance

Company registration & administration (Russia, US/Delaware, Cambodia, Hong Kong), banking

SECURITY

Information Security

PGP encryption & signing, full-disk/system encryption, hardening, access control, vulnerability audits, secure server infrastructure, thin clients. Self-taught offensive-security fundamentals: wireless network security testing (Kali Linux), SQL injection & database resilience testing, QR/Base64-encoded data analysis.

FINTECH / CRYPTO

Payment Systems & Fintech

Stripe, PayPal, Coinpayments, custom payment aggregators, SWIFT (MT103/MT202/MT799, RMA), crypto payments (ETH/ERC20, TRX/TRC20), OAuth

BUSINESS & COMPLIANCE

Management & Coordination

Coordinating teams of up to 50 people, project & contractor management, IT infrastructure for large events

compliance, corporate account opening, contract management

Languages: Russian (native), English (fluent, IELTS 7.9, 2008)

Experience

Facebook Marketplace/Groups Automation Tool Development

2025 — Present

Independent project

- Independently designed and built (using AI tools, Copilot) a Python/Selenium script for automated posting of listings to Facebook Marketplace and groups.
- Implemented reading of source data from a pipe-delimited CSV, a tkinter GUI, browser tab management, and automatic multi-photo upload.

Telegram Mini-App Online Store — YoYo Shop

2023 — Present

Cambodia (family project)

- Developed and maintained a product catalog as a Telegram mini-app; automated order processing.
- The store has since fully migrated to the Grab Cambodia app.

Founder & Director — SKASALE CO., LTD

2017 — Present

Cambodia · episodic/project-based

- Founded the company (2017), VAT registration; negotiated and managed contracts with international booking platforms — Booking.com, Agoda, Expedia.
- Built the company's banking infrastructure: comparative analysis of ~15 Cambodian banks on account-opening terms and POS acquiring; set up international payment acceptance (SWIFT, Maybank Cambodia, ABA Bank).
- 2018 — due diligence for a bunker fuel supply project (RMG 380): import scenarios, customs duties, quality certification.
- 2019 — commission agent on 5 equipment supply projects (elevators) between Silver Elevator Korea and clients in Russia and Kazakhstan.
- 2020–2021 — official dealer/representative for electronics brand EnnoPro Group Limited in Cambodia, including retail deals such as selling hybrid car batteries to a local auto service shop.
- 2021 — organized international industrial equipment supply deals between Chinese suppliers and buyers in Russia/CIS — contracting, logistics (FOB/CIF), margin control.
- Studied payment infrastructure standards (SWIFT, Wolfsberg Guidance); corresponded with foreign banks on correspondent banking relationships (RMA).
- Registered a developer account with the Visa Developer Center (Sandbox activated, 2019).
- Built a proprietary IT & Compliance Consulting practice for Southeast Asian businesses — company registration, licensing, market research.

Founder — Ensis Limited

2019 — 2024

Hong Kong · currently inactive

- Founded and sole owner of the company (Certificate of Incorporation No. 2812611, Hong Kong Companies Registry); sole director and shareholder.
- Personally opened a corporate account with Bank of China (Hong Kong) — traveled to Hong Kong (~2 weeks) to complete banking compliance and sign documents in person.

IT Infrastructure & Platform Development — Crypto Platform

2020 — 2021

Kubera / WinAllGo / Dzambala LLC

- Infrastructure support for a crypto gambling platform: office setup, internet infrastructure, ad campaign automation across Facebook Ads, push ads, Google Ads.
- Developed and maintained a PHP/Laravel web platform on VPS (Linux, cPanel on GoDaddy; parallel testing on AWS EC2); maintained the GitHub repository.
- Integrated PayPal, Stripe, Coinpayments, crypto wallets (Metamask/ETH, Tronlink/TRX), plus a custom payment aggregator API for Vietnam/India markets (Zalo, Momo, ViettelPay, Paytm, UPI, Razorpay).
- Developed a Telegram bot on a third-party PHP SDK; operational management of a call center of up to 50 people.
- 2021 — founded Dzambala LLC (Delaware, USA) as a legal entity for accepting payments; deployed separate server infrastructure (CentOS 7 + cPanel).

IT Infrastructure — Libra Mining

~2022 (6 months)

Crypto project

- Deployed and supported multiple offices with redundant internet connections to ensure call center continuity.
- Procured and configured equipment, including CCTV systems for call center oversight.
- Developed the project's coin smart contract on Ethereum; authored the technical white paper and roadmap.

Power, Sound & Lighting Infrastructure Design — “Kazantip” Festival

Oct 2014 — Feb 2015

Cambodia · project-based

- Full design of the event's power infrastructure: load distribution across 5 generators with precise capacity calculations (Ah).
- Designed sound (JBL SRX, Meyer Sound) and lighting (LED PAR, Blinder, Strobe) infrastructure across multiple stage zones.
- Opening planned for Feb 18, 2015 on Koh Pos Island (Snake Island); fully prepared, cancelled by Cambodian authorities at the last moment.

Head of Cultivation — Hydroponic Farm / Microgreens

Jul 2022 — Apr 2025

Cambodia

- Full responsibility for the production cycle: seed and substrate procurement, sourcing nutrient suppliers (Spain) and seed suppliers (UK).
- Automated growing processes using IoT devices (Xiaomi Mi). Business sold to partners in April 2025.

Visa & Immigration Consultant

Jan 2022 — Dec 2025

Expat services, Cambodia

- Full-service support for clients on visa and ID matters (“bring the documents, I’ll handle everything” model), premium market segment.

Founder — Nikson LLC (ООО «НИКСОН»)

Jun 2014 — Jul 2015

Vladivostok

- Founded and served as sole owner of the company (OGRN 1142540004970), registered June 30, 2014; handled IT-agency-type activities as part of preparations to relocate abroad.

IT Support for Election Campaign

May — Sep 2013

Vladivostok Mayoral Election Campaign

- As part of a development team, designed an Android app for conducting sociological surveys ("People's Expertise") with real-time server sync for campaign HQ.
- Developed a ballot-scanning system for internal party primaries; procured and deployed 200+ Android tablets.

IT Consultant, Corporate Network Reconstruction

Apr 2009 — Sep 2009

Far East-Building Construction, Primorsky Krai

- Reconstructed the corporate network; designed CCTV and a personalized access-control system.
- Synchronized 1C across 3 servers; consolidated ~9-13 group companies into a single infrastructure across two cities.

Information Security Consultant

Mar 2008 — Mar 2009

Group of Companies (Edison / GUM / Green Cafe holding), Vladivostok

- Conducted a vulnerability audit of the group's IT infrastructure.
- Implemented thin clients and PGP encryption for corporate phones and email; built a hidden, secured server infrastructure.

Internship — Database Systems Support

Jun 2004 — Sep 2004

Vladivostok Traffic Police (GAI) Division

- Summer internship as part of law faculty studies (specialization in criminal law / IT crime); configured and supported a records database as practical coursework.

Specialist, Tax Reporting Server — FAPSI

Jan 2005 — Jun 2005

Vladivostok

- Built and configured a tax reporting server for electronic filing by legal entities; trained new staff.
- First hands-on experience with PGP data encryption.

IT Support & Debt Collection Specialist — RosBank

Feb 2006 — Aug 2006

Vladivostok

- Problem debt department: liaised with third-party credit organizations; worked with databases.
- Left this role in August 2006 following a car accident that required an extended recovery period.

Freelance Web Development — TRF-United

Sep 2007 — Dec 2007

Vladivostok

- Developed an interactive catalog of HS (customs) codes using jQuery/AJAX/XML.

System Administrator (project-based) — Avtogarant Insurance

Apr 2007 — Aug 2007

Vladivostok

- Administered the branch network (~20 employees); synced with the federal network; supported 1C and insurance product databases.

Semi-Freelance IT Support

Jan 2007 — Dec 2013

Restart LLC, Far East Mortgage Broker, "Hot Car" (AVTOREGION 25), and others, Vladivostok

- Ongoing project-based IT support for multiple private clients: computer and database setup, documentation assistance.

Developer & System Administrator (seasonal) — Avtopartner Co. Ltd.

Dec 1999 — Feb 2000

Vladivostok

- Built a Russian-language clone of Japanese car auction sites: PHP scraping at 5-minute intervals, SQL matching database, emulated hardware USB security token.

Developer (seasonal) — “Kontinent Advertising Materials”

Dec 2000 — Feb 2001

Vladivostok

- Built a custom PHP/MySQL CMS for an online product catalog, allowing sellers to add and remove products themselves.

Education

Faculty of Law — Criminal Law (IT Crime)

2004 — 2008

Far Eastern State University (DVGU), Vladivostok

- Thesis: “Prevention of Crimes in the Field of Computer Information.”
- Internship — database systems support at the Vladivostok Traffic Police (GAI) division.

Computer Software & Automated Systems

1999 — 2004

Institute of Mathematics and Computer Science, DVGU, Vladivostok

- Thesis project — visualization of oceanographic data from buoys in the Sea of Okhotsk for tracking gray whales: FTP data collection, SQL processing, map-based visualization.
- Academic advisor — V.V. Gribova (Institute of Automation and Control Processes, Far Eastern Branch of the Russian Academy of Sciences). Received a letter of appreciation from Greenpeace for the project.

Additional

IELTS — 7.9 (2008). Junior Achievement certificate, "Applied Economics" (1999). First entrepreneurial experience — ran a computer club as a student (2002–2003, informal venture).
